SUBJECT INDEX

Blood banking

Viewpoint: Should D^u positive mothers receive Rh immune globulin? July 21
Painless education: A microcomputer in the donor room. October 59
Boosting the blood supply with hospital teamwork. October 79
Troubleshooting the crossmatch through flow diagrams. October 95
Better service from blood bank to bedside. November 129
Viewpoint: When to use granulocyte transfusions. December 21

Career development

Reflections: Motivation: Your chance to help others help themselves. January 82
Why I stepped down the job ladder. January 93
Reflections: What's in a name? For technologists, not enough. February 131
Certification and recertification: Where we stand. March 32
Market yourself to a better job. April 77
Reflections: Combatting our old enemy, stress. April 149
Growth contracting: A step beyond performance evaluation. May 61
Full-time mom, part-time tech. May 67
Now for a few well-chosen words from the supervisor. May 79
Prison lab: Maximum health care in maximum security. May 90
Is MLT training a waste of time? June 61
A promising future for MLTs. June 69
Self-development: Tapping your potential for success. June 117
Delegation: How to make yourself dispensable—and promotable. July 63
Meeting the need for cytogenetic technologists. August 79
Reflections: What kind of professional image do we deserve? August 109
Do we know what makes technologists tick? September 109
Reflections: Is loyalty in the lab an impossible dream? September 132
Reflections: Building a management library. October 106
Assessing a career in laboratory sales. December 87

Certification and licensure

Washington report: The $38,000 question: Can the lab field regulate itself? March 27
Certification and recertification: Where we stand. March 32
In search of a better credentialing system. March 47
Washington report: Lab groups stick with NCHCA despite ASCP's departure. May 27
The new certification exam in laboratory management. June 73
Reflections: AMT and ISCLT: Together again for the first time. July 119
Washington report: Lab groups pitted against pathologists over FTC jurisdiction. September 27

Communication

Developing an effective cardiac profile. February 53
The laboratory's role in managing infectious diseases. February 75
How to survive a computer breakdown. February 94
How one microbiology lab serves four hospitals. March 99
Making the laboratory part of a trauma unit. March 108
How clinicians view the laboratory: Labs score high in quality and reliability. April 32
How clinicians view the laboratory: If only test results had wings. April 43
Teledialog: Continuing education by phone. April 63
Turn your laboratory into a think tank. April 99
Now for a few well-chosen words from the supervisor. May 79
Breaking out of the lab and onto hospital rounds. June 54
Solving problems through the nominal group technique. July 73
A guide to effective counseling. July 88
On-the-job CE in clinical chemistry. July 97
Tune in to the informal organization in your lab. July 102
Teaming up on TDM. August 41
Have CE show, will travel. August 71
A laboratory experiment in preventive medicine. August 93
Handling complaints and grievances. August 101
How the laboratory should relate to clinicians. September 43
A guide to better information management. September 117
One pathologist's experience as a clinician. October 33
Why pathologists should head up utilization review. October 102
Are you steaming or teaming? November 76
Tops in '82: The winners of MLO's Article Awards Contest. November 121
Negotiating a union contract. December 58
A guide to effective listening. December 83

Continuing education

Lab salaries and benefits: The tight squeeze. January 33
Videotape makes in-service training special. January 65
Certification and recertification: Where we stand. March 33
Teledialog: Continuing education by phone. April 63
How we standardized our WBC differentials. April 109
The new certification exam in laboratory management. June 73
On-the-job CE in clinical chemistry. July 97
Have CE show, will travel. August 71

(continued)

Meeting the need for cytogenetic technologists. August 79
Proficiency testing for the night staff. November 98

Data processing
How to survive a computer breakdown. February 94
A computerized daily QC program. March 79
How one microbiology lab serves four hospitals. March 99
How a word processor streamlined our quality control. June 47
Adjusting doses with a microcomputer. August 62
How the laboratory should relate to clinicians. September 43
Use computer matching to select—not settle on—MT students. September 73
How a computer turned our lab around. September 101
A guide to better information management. September 117
Painless education: A microcomputer in the donor room. October 59
Developing computerized lab management reports. December 75

Design
Viewpoint: Let's QC our work enviroment. March 21
Reflections: Work environment: Missing link to productivity? May 135

Ethics
Giving health care a human touch. March 64
Washington report: Despite budget cuts, HCFA's lab enforcement efforts very much alive. August 25
Viewpoint: Caring: An integral part of health care. September 21
Reflections: Is loyalty in the lab an impossible dream? September 132

Financial management
Lab salaries and benefits: Will a talent drain help? January 43
Viewpoint: The haves and have-nots: A dilemma in hospital care. February 21
Washington report: Federal cuts loom for pathologist reimbursement and health education. April 27
A simplified approach to cost analysis. July 53
Viewpoint: Caring: An integral part of health care. September 21
Improving lab utilization through test profiles. September 32
Simple budgeting in the hospital laboratory. September 87
Washington report: Congress puts squeeze on lab reimbursement. October 27
A guide to marketing your laboratory's services. October 40
Why hospital labs should market specialized testing. October 51
Viewpoint: Beyond the HMO—creating an incentive system to control hospital costs. November 21
Washington report: CAP blasts proposed regulations on pathologist reimbursement. December 27

Foreign/unusual laboratories
Where the world's deadliest pathogens are the workload. February 40
Prison lab: Maximum health care in maximum security. May 90

Fringe benefits
Lab salaries and benefits: The tight squeeze. January 33
Lab salaries and benefits: Will a talent drain help? January 43

Government relations
Washington report: FDA, manufacturers try to resolve dilemma over mandatory performance standards. January 27
Washington report: HCFA details plans to probe laboratories in 1982. February 27
Washington report: The $38,000 question: Can the lab field regulate itself? March 27
Washington report: Federal cuts loom for pathologist reimbursement and health education. April 27
How consistent are laboratory inspections? May 105
Washington report: HCFA promises crackdown after latest report on lab overcharges. July 27
Washington report: Despite budget cuts, HCFA's lab enforcement efforts very much alive. August 25
Washington report: Lab groups pitted against pathologists over FTC jurisdiction. September 27
Washington report: Congress puts squeeze on lab reimbursement. October 27
Washington report: Study finds Federal regulation of labs still needed but greater voluntary role possible. November 27
Washington report: CAP blasts proposed regulations on pathologist reimbursement. December 27

Inspection and accreditation
Washington report: HCFA details plans to probe laboratories in 1982. February 27
Confessions of a JCAH surveyor. February 103
Washington report: Federal cuts loom for pathologist reimbursement and health education. April 27
How consistent are laboratory inspections? May 105
Being systematic about preventive maintenance. July 41
Washington report: Despite budget cuts, HCFA's lab enforcement efforts very much alive. August 25

Instruments
Washington report: FDA, manufacturers try to resolve dilemma over mandatory performance standards. January 27
Comparing the new automated microbiology systems. February 119
Being systematic about preventive maintenance. July 41
A simplified approach to cost analysis. July 53

Labor relations
Action builds on the union front. January 98
How we won our anti-union fight. April 51
Handling complaints and grievances. August 101
Laboratory unions: Most employees still say no. December 34
Laboratory unions: These employees say yes. December 46
Negotiating a union contract. December 58
The pros and cons of managing union and nonunion labs. December 69
Reflections: Unionization: How fast it grows is up to you. December 105

Laboratory of the future
Viewpoint: Will you die with a hammer in your hand? June 21
Washington report: Modest surplus, some shortages predicted in pathology manpower for 1990. June 25
Toward perfect chemistry testing. July 33
Viewpoint: Monoclonal antibodies: The newest magic bullet in our arsenal. October 21

Legal problems
Washington report: HCFA details plans to probe laboratories in 1982. February 27
Keeping sexual harassment out of the lab. February 32
Once isn't always enough: The second opinion in pathology. March 54
Malpractice: Bracing for a new crisis. May 32
How your lab can minimize malpractice risks. May 41
Forensic autopsies: Who should do them? May 50
Two cases of sexual harassment. June 38
Washington report: Despite budget cuts, HCFA's lab enforcement efforts very much alive. August 25

Maintenance
Viewpoint: Let's QC our work environment. March 21
Being systematic about preventive maintenance. July 41

Management techniques
11 common errors in performance reviews. January 55
Managing the vengeful employee. January 87
Action builds on the union front. January 98
Reflections: Motivation: Your chance to help others help themselves. January 113
A helpful good-bye: The exit interview. February 65
Managing the nonconformist. February 114
Rehabilitating the alcoholic employee. March 71
Reflections: Staff motivation: Where do you start? March 119
Teaching management to MT students. April 91
Turn your laboratory into a think tank. April 99
Quality assurance: Hard work is the key. April 124
How to recognize and treat the burned-out employee. April 135
Growth contracting: A step beyond performance evaluation. May 61
Now for a few well-chosen words from the supervisor. May 79
Helping an employee over the rough spots. May 113
Setting up an effective salary administration program. June 30
Two cases of sexual harassment. June 38
When to salvage the failing employee. June 84
Picking a winner: A guide to effective employment interviews. June 97
Delegation: How to make yourself dispensable—and promotable. July 63
A guide to effective counseling. July 88
Participative management: Let's turn the myth into reality. July 113
Handling complaints and grievances. August 101
Strategies for boosting lab productivity. September 61
A six-step approach to behavior modification. September 94
Are you a victim of management DIC? October 71
Reflections: Building a management library. October 106
Job enrichment: Whose responsibility is it? November 58
Managing the dissatisfied employee. November 111
Reflections: Are you a manager who inspires? November 141
Laboratory unions: Most employees still say no. December 34
Laboratory unions: These employees say yes. December 46
The pros and cons of managing union and nonunion labs. December 69
Developing computerized lab management reports. December 75

When to salvage the failing employee. June 84
Picking a winner: A guide to effective employment interviews. June 97
A guide to effective counseling. July 88
Tune in to the informal organization in your lab. July 102
Handling complaints and grievances. August 101
A six-step approach to behavior modification. September 94
Do we know what makes technologists tick? September 109
Job enrichment: Whose responsibility is it? November 58
Managing the dissatisfied employee. November 111
A guide to effective listening. December 83
Reflections: Unionization: How fast it grows is up to you. December 105

Problem solving
Viewpoint: Living with the risk—and the anxiety—of hepatitis. January 21
11 common errors in performance reviews. January 55
Developing an effective cardiac profile. February 53
How to survive a computer breakdown. February 94
Rehabilitating the alcoholic employee. March 71
A computerized daily QC program. March 79
When test results call for sleuthing. March 91
Turn your laboratory into a think tank. April 99
Quality assurance: Hard work is the key. April 124
How to recognize and treat the burned-out employee. April 135
Forensic autopsies: Who should do them? May 50
Two cases of sexual harassment. June 38
How we improved our school's admissions procedure. June 107
Solving problems through the nominal group technique. July 73
Teaming up on TDM. August 41
Drug assays vs. formulas: Key choices in managing patients. August 55
Adjusting doses with a microcomputer. August 62
Handling complaints and grievances. August 101
Improved specimens: A giant step for lab quality. September 53
How a computer turned our lab around. September 101
Boosting the blood supply with hospital teamwork. October 79
Troubleshooting the crossmatch through flow diagrams. October 95
How flowcharts improve RBC morphology reporting. November 49

Productivity
Changes in workload recording for 1982. January 75
Reflections: Work environment: Missing link to productivity? May 135
Viewpoint: Will you die with a hammer in your hand? June 21
Setting up an effective salary administration program. June 30
Strategies for boosting lab productivity. September 60
Changes in microbiology workload recording for 1983. October 87

Professional relations
Developing an effective cardiac profile. February 53
The laboratory's role in managing infectious diseases. February 75
Confessions of a JCAH surveyor. February 103
Reflections: What's in a name? For technologists, not enough. February 131
Once isn't always enough: The second opinion in pathology. March 54
Making the laboratory part of a trauma unit. March 108
How clinicians view the laboratory: Labs score high in quality and reliability. April 32
How clinicians view the laboratory: If only test results had wings. April 43
Viewpoint: Which tests become all-time favorites? May 21
Malpractice: Bracing for a new crisis. May 32
How your lab can minimize malpractice risks. May 41
Forensic autopsies: Who should do them? May 50
Washington report: Modest surplus, some shortages predicted in pathology manpower for 1990. June 25
Breaking out of the lab and onto hospital rounds. June 54
Reflections: A salute to people who make things happen. June 130
Reflections: AMT and ISCLT: Together again for the first time. July 119
Reflections: What kind of professional image do we deserve? August 109
Viewpoint: Caring: An integral part of health care. September 21
Improving lab utilization through test profiles. September 32
How the laboratory should relate to clinicians. September 43
How many ways can sales reps help your lab? September 125
Reflections: Is loyalty in the lab an impossible dream? September 132
One pathologist's experience as a clinician. October 33
Why pathologists should head up utilization review. October 102
Are you steaming or teaming? November 76
Assessing a career in laboratory sales. December 87

Purchasing
Comparing the new automated microbiology systems. February 118
A simplified approach to cost analysis. July 53
Selecting a reference lab: A two-step approach. July 81
How many ways can sales reps help your lab? September 125
A guide to marketing your laboratory's services. October 40

Quality control
A computerized daily QC program. March 79
Viewpoint: Clinical relevance: The quintessence of quality control. April 21
How we standardized our WBC differentials. April 109
Quality assurance: Hard work is the key. April 124
How consistent are laboratory inspections? May 105
How a word processor streamlined our quality control. June 47
Improved specimens: A giant step for lab quality. September 53
Quality assurance: The lab's role demystified. November 69
Using patient data for QC in coagulation. November 83
Proficiency testing for the night staff. November 98
Better service from blood bank to bedside. November 129

Record keeping
Developing an effective cardiac profile. February 53
Teaming up on TDM. August 41
Adjusting doses with a microcomputer. August 62
How a computer turned our lab around. September 101
A guide to better information management. September 117
Developing computerized lab management reports. December 75

Regulation

Washington report: FDA, manufacturers try to resolve dilemma over mandatory performance standards. January 27
Washington report: The $38,000 question: Can the lab field regulate itself? March 27
Washington report: Lab groups stick with NCHCA despite ASCP's departure. May 27
We found a bomb in our laboratory. May 129
Washington report: HCFA promises crackdown after latest report on lab overcharges. July 27
Washington report: Despite budget cuts, HCFA's lab enforcement efforts very much alive. August 25
Washington report: Lab groups pitted against pathologists over FTC jurisdiction. September 27
Washington report: Congress puts squeeze on lab reimbursement. October 27
Washington report: Study finds Federal regulation of labs still needed but greater voluntary role possible. November 27
Washington report: CAP blasts proposed regulations on pathologist reimbursement. December 27

Safety

Viewpoint: Living with the risk—and the anxiety—of hepatitis. January 21
Where the world's deadliest pathogens are the workload. February 40
Viewpoint: Let's QC our work environment. March 21
We found a bomb in our laboratory. May 129
Viewpoint: The aborigines among us. August 21
We simulate accidents to improve lab safety. November 32
Disaster drills with a difference. November 39

Salaries

Lab salaries and benefits: The tight squeeze. Janaury 33
Lab salaries and benefits: Will a talent drain help? January 43
Setting up an effective salary administration program. June 30

Staffing

Full-time mom, part-time tech. May 67
Picking a winner: A guide to effective employment interviews. June 97

Technical procedures

Developing an effective cardiac profile. February 53
The laboratory's role in managing infectious diseases. February 75
How we standardized our WBC differentials. April 109
Toward perfect chemistry testing. July 32
The surge in therapeutic drug monitoring. August 30
Teaming up on TDM. August 41
Critical values for drug levels. August 46
Drug assays vs. formulas: Key choices in managing patients. August 55
Adjusting doses with a microcomputer. August 62
Viewpoint: Monoclonal antibodies: The newest magic bullet in our arsenal. October 21
How flowcharts improve RBC morphology reporting. November 49
Viewpoint: When to use granulocyte transfusions. December 21

Training programs

Videotape makes in-service training special. January 65
Giving health care a human touch. March 64
Teledialog: Continuing education by phone. April 63
Teaching management to MT students. April 91
How we standardized our WBC differentials. April 109
Want better phlebotomists? First teach them! May 119
Is MLT training a waste of time? June 61
A promising future for MLTs. June 68
How we improve our school's admissions procedure. June 107
Meeting the need for cytogenetic technologists. August 79
Use computer matching to select—not settle on—MT students. September 73
A bill of rights for medical technology interns. November 91
Proficiency testing for the night staff. November 98

Unions

Lab salaries and benefits: Will a talent drain help? January 43
Action builds on the union front. January 98
How we won our anti-union fight. April 51
Laboratory unions: Most employees still say no. December 34
Laboratory unions: These employees say yes. December 46
Negotiating a union contract. December 58
The pros and cons of managing union and nonunion labs. December 69
Reflections: Unionization: How fast it grows is up to you. December 105

Workload management

Changes in workload recording for 1982. January 75
Making the laboratory part of a trauma unit. March 108
How clinicians view the laboratory: Labs score high in quality and reliability. April 32
How clinicians view the laboratory: If only test results had wings. April 43
Being systematic about preventive maintanence. July 41
Improving lab utilization through test profiles. September 32
Strategies for boosting lab productivity. September 61
Changes in microbiology workload recording for 1983. October 87
Quality assurance: The lab's role demystified. November 69
Developing computerized lab management reports. December 75

Management Q & A, Tips, Washington Report Index

New supervisor
Leaving the testing to the staff. January 115
Weighing skills to pick a supervisor. March 124
Older employees, young boss. April 144

Patient relations
To pinpoint clinicians' use of data. January 115

Planning
Marketing lab services to physicians. February 139
Group purchasing. March 121
What goes into annual activity reports? July 123
Who does inventory control? December 107

Problem employee
A tech accused of sink testing. February 139
New technology stymies an older tech. March 121
Ill at ease with an ex-drug user. April 142
She envies another tech's duties. May 148
Detect unrest before an explosion. August 116
Overweight in a crowded lab. September 138
A supervisor unnerved by an employee. October 111
Getting a genius to be neat. November 146

Problem supervisor
Don't rub it in if a boss is at fault. August 118

Professionalism
A dress code but no free lab coats. February 134

Quality control
Standard of service when labs merge. January 116
Economizing on quality control. January 118
A tech accused of sink testing. February 139
When the lab doesn't collect specimens. June 136
Test data challenged by a doctor's lab. June 138
Different types of errors. September 135
Should lab do inappropriate tests? October 119
QC coordinator faces antagonism. December 107

Safety
Smoke and ·nack somewhere else. July 124

Salaries
Must employees keep mum about pay? February 134
Do some techs settle for low pay? May 145
Pay gap between supervisor and tech. June 135
Unequal pay for supervisors. November 145

Scheduling
A rotation resulting in spotty work. January 115
Orderly vacation scheduling. February 139

Staffing
A rotation resulting in spotty work. January 115
A tech acc sed of sink testing. February 139
A full-timer or several part-timers? February 140
Should one person do test development? March 122
Is turnover really so bad? April 142
Do rules bar unsupervised MLTs? April 144
Is tending an ill child sick-leave abuse? June 136
The war between the shifts. July 123
Separating staff levels by teaching duties. July 126
Finding a tech who can program. October 119
When a promotion isn't working out. October 119
A night shift that wants more work. November 150

Supplier relations
Group purchasing. March 121
Who goes on the training trip? April 142
Conflict of interest. September 135

Technical protocols
How to centralize drug monitoring. November 145

Training
Who goes on the training trip? April 142
Defining staff levels by teaching duties. July 126
Proposed Federal MT standards. September 135
A subpar lab school. September 138
Where teach instrument repair? November 146

Workload management
Relax, it's only a time study. January 116
What goes into annual activity reports? July 123
Cutting down on interruptions. November 146

TIPS ON TECHNOLOGY INDEX

Alcohol and lab results: August 15
Alkaline phosphatase and malignancy: November 17
Antibiotic susceptibility testing: June 13
Apt test: October 17
Atypical lymphocytes: April 15
Barium enemas: January 17
Bilirubin, neonatal: May 15
Bleeding times: November 11
Blood culture contamination rate: September 15
Blood culture protocol: July 17
Blood gas measurements: September 13
Blood units, wasted: May 13
Cervical cultures: March 15
Clonidine test: January 13
Coagulation tests, newborn: September 15
Cord blood: January 13
Creatinine clearance: July 13
Crossmatches, reading: June 15
Crossmatching of platelet concentrates: February 13
Crystals, urine: October 13, November 11
Cyanide hazard: November 17
Daily mean, patients': October 13
Diet and lab results: April 13
Differential counts: January 17
Drug levels, panic values for: April 17
Effects of time of day: December 13
Elevated LDH: December 15
Eosinophils: February 17
Ethanol ingestion and lab results: August 15
Fasting and lab results: April 13
Fetal vs. maternal hemoglobin: October 17
Fibrin formation and myeloma: October 17
Foley catheter tips: December 13
Glucose tolerance: January 13
Glucose, urine: September 13
Group B Strep: February 15
Histology fumes: February 17
Hyperbilirubinemia of fasting: June 17
Isoenzymes: February 13
LDH, elevated: December 15
Lipemic sera: March 13
Lithium, RBC: August 17
Lymphocytes, atypical: April 15
Myoglobin assays: October 15
Neonatal bilirubin: May 15
Neonatal blood: January 13
Newborn coagulation tests: September 15
Newborn gastric aspirates: December 15
Osmolality, serum: July 15
Panic values for drug levels: April 17
Patients' daily mean: October 13
Pediatric sedimentation rates: July 13
Plasma and red cell blood volumes: August 17
Plasma-lyte: March 13
Platelet concentrates, crossmatching of: February 13
Platelet transfusions: August 13
RBC lithium: August 17
Reading crossmatches: June 15
Reference values, March 15
Reticulocyte count: June 13
Reticulocyte counts on stored blood: December 17
Sedimentation rates, pediatric: July 13
Serum osmolality: July 15
Sickle cell screening: January 17
Specific gravity: January 15
Stability of analytes: November 15
Staphylococcus aureus: May 17
Stool leukocytes: March 17
Stool pH: May 15
Streptococcus, Group B: February 15
Susceptibility testing, antibiotic: June 13
Throat cultures: October 13
Tissue juices: April 13
Transfusion reactions: September 17
24-hour urine collections: August 15
Unsolicited test results: December 13
Urine crystals: October 13, November 11
Urine glucose: September 13
Urine sediment: February 15
VDRL: August 13
Wasted blood units: May 13

WASHINGTON REPORT INDEX

FDA, manufacturers try to resolve dilemma over mandatory performance standards. January 27
HCFA details plans to probe laboratories in 1982. February 27
The $38,000 question: Can the lab field regulate itself? March 27
Federal cuts loom for pathology reimbursement, health education. April 27
Lab groups stick with NCHCA despite ASCP's departure. May 27
Modest surplus, some shortages predicted in pathology manpower for 1990. June 25
HCFA promises crackdown after latest report on lab overcharges. July 27
Despite budget cuts, HCFA's lab enforcement efforts very much alive. August 25
Lab groups pitted against pathologists over FTC jurisdiction. September 27
Congress puts squeeze on lab reimbursement. October 27
Study finds Federal regulation of labs still needed but greater voluntary role possible. November 27
CAP blasts proposed regulations on pathologist reimbursement. December 27
